

Greenland in Figures 2017

The 14th revised edition of the popular, English-language leaflet of Statistics Greenland has come out with much useful information on Greenland.

Greenland in Figures is an offer to readers requiring easily accessible statistical information in English. The leaflet appeals to tourists and people wishing to give business connections and friends outside the country a quick introduction to the Greenlandic society. The leaflet contains 40 pages of information on the population, the climate, the economy, and much more.

Greenland in Figures is available for download from this page and can also be ordered free of charge by contacting Statistics Greenland.
