

## Correction in the number of guests stays and number of overnights in hotels

### Correction

Statistics Greenland has found an error in the reported number of guests and overnights in the Kommune Kujalleq region in May 2017 which is now amended in our statistic bank.

Statistics Greenland has also received late reports regarding to the 2<sup>nd</sup> quarter of 2018, after our release on 15<sup>th</sup> August. We have incorporated the figures on those reports in to the statistic bank.

The error has influenced the annual release for 2017 published under *Overnight guests in 4th quarter of 2017*.

Our last release *Overnight guests in 2<sup>nd</sup> quarter of 2018* published on 15<sup>th</sup> August, has be affected by the error as well as the new figures received after the release date.

The graphics and tables in this rapport show the figures after the correction.

### Annual rapport of 2017

There was an increase of 11.8% in the number of guest for the whole 2017 as compared to 2016.

However, part of the increase (approx. 3.5% of the total number for 2017) is due to the new accommodations reports that Greenland Statistics has incorporated in 2017.

It has affected especially two areas, Kommune Kujalleq (21% of the increase of guest) and Kommune Sermersooq Øst (10% of the increase of the guest). The Qaasuitsup area has be influenced in a minor level.

**Table1.Number of guest stays in 2016-2017 (all year)**

|                    | 2016          |                      | 2017          |                       |
