Remarks

Statistics Greenland receives data from most of the accommodations in Greenland, and for the biggest hotels. The figures are preliminary and they might change when Statistics Greenland receive missing reports or corrections.

Small corrections have been made in the 2017 – definitions of the “Unknown” and “Other countries” categories, as compared to earlier years. In previous data releases, guests with unknown residency are included in “Other countries”.

As of 2017, the “Unknown” category is used for guests with unknown residency.

Due to reports late arrival, there are approx. 2.70 pct. of the guests and 2.72 pct. of the overnights estimated based on figures for the same period 2018.
